

Pro Putting Tips

1. Keep your eyes over the top of the ball.

This allows you to look down the line of the putt which will ensure that you start the putt on the line you have chosen.

2. Keep your head still.

Try to make sure that you complete the stroke before looking at the ball. Try it from inside 4 feet and see if you can listen for the ball dropping in the hole rather than looking.

3. Line up correctly.

Draw a line on the ball if it doesn't have one then all you have to do is align the markings on the putter with the line on the ball.

4. Maintain your stroke.

Whether it's Winter and the greens are slow or Summer and the greens are quick, try to maintain your stroke at all times. Putts should not be hit hard or soft but instead lengthen and shorten the stroke in accordance with the pace of the putt.
